Name _____ Date _____

CODEBREAKERS MISSION FILE B

Code Debugger I

Each program prints a number pattern, but something went wrong. Find the bug.

PROGRAM 1 // the code is right. Is the output?

```
start at 6
repeat 6 times
  print the number
  + add 4
```

OUTPUT

6	10	15	18	22	26

Circle the incorrect number.

It should be _____ .

PROGRAM 2 // the code is right. Is the output?

```
start at 80
repeat 7 times
  print the number
  - subtract 6
```

OUTPUT

80	74	68	64	56	50	46

Circle the 2 incorrect numbers.

They should be _____ and _____ .

PROGRAM 3 // the code is right. Is the output?

```
start at 1
repeat 6 times
  print the number
  × multiply by 2
```

OUTPUT

1	3	4	8	14	32

Circle the 2 incorrect numbers.

They should be _____ and _____ .

PROGRAM 4 // the code is right. Is the output?

```
start at 40
repeat 4 times
  print the number
  ÷ divide by 2
```

OUTPUT

40	20	12	5

Circle the incorrect number.

It should be _____ .

```

OUTPUT

5 10 16 20 25 30

Circle the incorrect number.

It should be 15 .

PROGRAM 3 // the code is right. Is the output?

```
start at 51
repeat 5 times
  print the number
  - subtract 7
```

OUTPUT

51 44 37 31 23

Circle the incorrect number.

It should be 30 .

PROGRAM 4 // the code is right. Is the output?

```
start at 12
repeat 6 times
  print the number
  + add 10
```

OUTPUT

12 21 32 42 52 62

Circle the incorrect number.

It should be 22 .

CODEBREAKERS MISSION FILE B

Code Debugger I

Each program prints a number pattern, but something went wrong. Find the bug.

PROGRAM 1 // the code is right. Is the output?

```
start at 18
repeat 5 times
  print the number
  + add 2
```

OUTPUT

18 20 32 24 26

Circle the incorrect number.

It should be 22 .

PROGRAM 2 // the code is right. Is the output?

```
start at 14
repeat 5 times
  print the number
  - subtract 2
```

OUTPUT

14 12 20 8 6

Circle the incorrect number.

It should be 10 .

PROGRAM 3 // the code is right. Is the output?

```
start at 63
repeat 6 times
  print the number
  - subtract 8
```

OUTPUT

63 55 47 41 31 23

Circle the incorrect number.

It should be 39 .

PROGRAM 4 // the code is right. Is the output?

```
start at 4
repeat 6 times
  print the number
  + add 5
```

OUTPUT

4 9 14 21 24 29

Circle the incorrect number.

It should be 19 .

CODEBREAKERS MISSION FILE B

Code Debugger I

Each program prints a number pattern, but something went wrong. Find the bug.

PROGRAM 1 // the code is right. Is the output?

```
start at 160
repeat 6 times
  print the number
  ÷ divide by 2
```

OUTPUT

160 | 79 | 40 | 20 | 12 | 5

Circle the 2 incorrect numbers.

They should be **80** and **10**.

PROGRAM 2 // the code is right. Is the output?

```
start at 430
repeat 5 times
  print the number
  - subtract 50
```

OUTPUT

430 | 380 | 331 | 280 | 240

Circle the 2 incorrect numbers.

They should be **330** and **230**.

PROGRAM 3 // the code is right. Is the output?

```
start at 255
repeat 5 times
  print the number
  - subtract 21
```

OUTPUT

255 | 233 | 213 | 182 | 171

Circle the 2 incorrect numbers.

They should be **234** and **192**.

PROGRAM 4 // the code is right. Is the output?

```
start at 259
repeat 7 times
  print the number
  + add 45
```

OUTPUT

259 | 304 | 350 | 394 | 439 | 484 | 539

Circle the 2 incorrect numbers.

They should be **349** and **529**.

CODEBREAKERS MISSION FILE B

Code Debugger I

Each program prints a number pattern, but something went wrong. Find the bug.

PROGRAM 1 // the code is right. Is the output?

```
start at 325
repeat 5 times
  print the number
  + add 35
```

OUTPUT

325 350 395 430 466

Circle the 2 incorrect numbers.

They should be **360** and **465** .

PROGRAM 2 // the code is right. Is the output?

```
start at 223
repeat 6 times
  print the number
  + add 21
```

OUTPUT

223 244 264 286 307 338

Circle the 2 incorrect numbers.

They should be **265** and **328** .

PROGRAM 3 // the code is right. Is the output?

```
start at 10
repeat 5 times
  print the number
  × multiply by 2
```

OUTPUT

10 22 40 80 162

Circle the 2 incorrect numbers.

They should be **20** and **160** .

PROGRAM 4 // the code is right. Is the output?

```
start at 339
repeat 5 times
  print the number
  - subtract 18
```

OUTPUT

339 321 304 285 276

Circle the 2 incorrect numbers.

They should be **303** and **267** .
