

Building with 3D Shapes

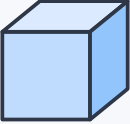

Count each shape in the castle. Write how many.

Example

 cube	 rectangular prism	 cone
<u>2</u>	<u>1</u>	<u>1</u>

 cube	 rectangular prism (box shape)	 cylinder	 cone	 pyramid
_____	_____	_____	_____	_____

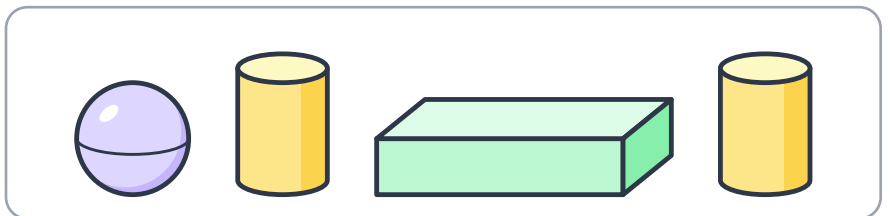

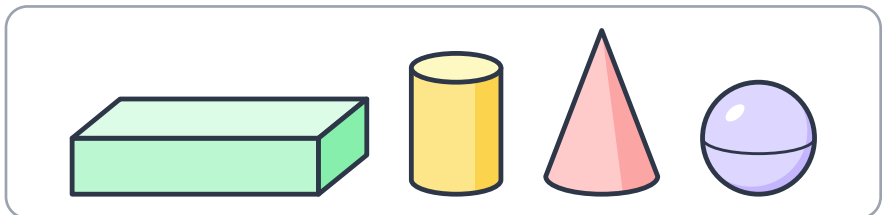

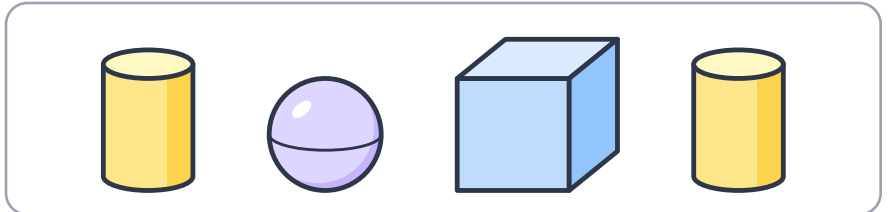

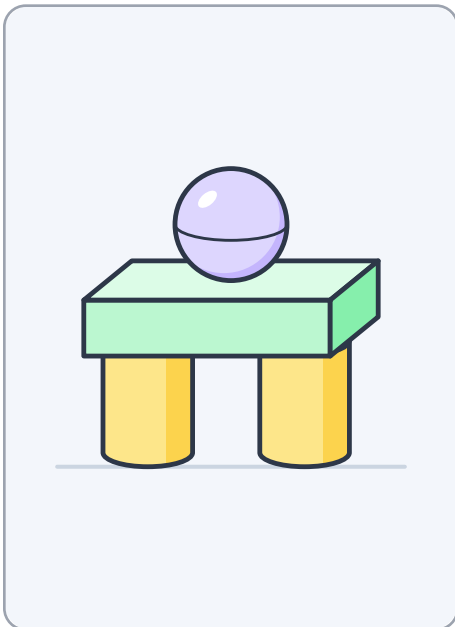

Building with 3D Shapes

Circle the set of blocks that made the build.

1.

2.

Building with 3D Shapes

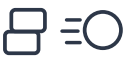

Can it stack or roll? Then find the block that fits.

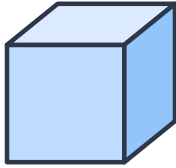

Circle stack, roll, or both.

 stack

 roll

 both

 stack

 roll

 both

 stack

 roll

 both

 stack

 roll

 both

 stack

 roll

 both

 stack

 roll

 both

Which block fits in the middle? Circle it.

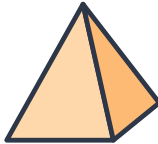

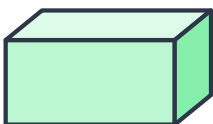

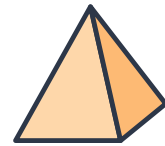

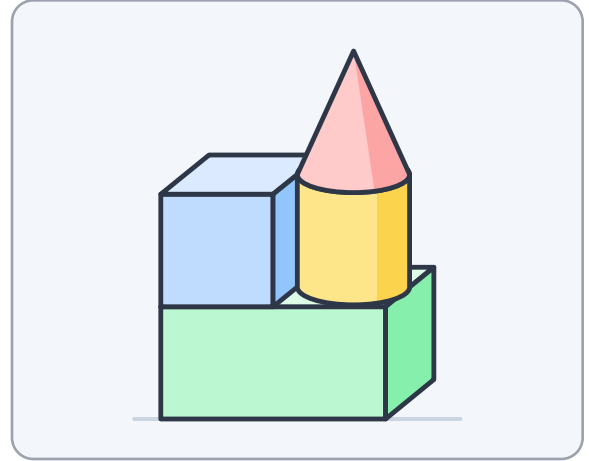

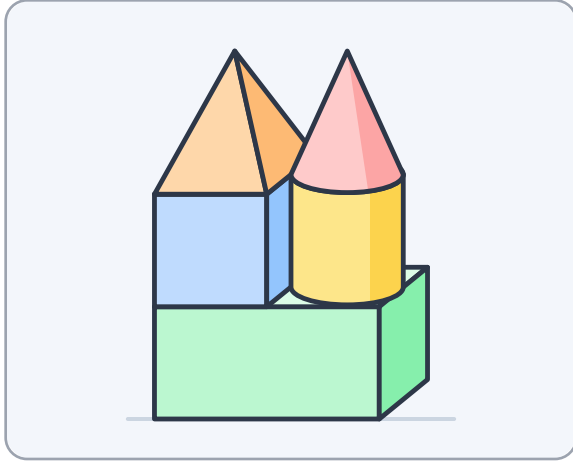

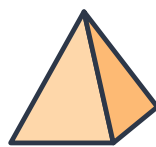

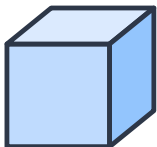

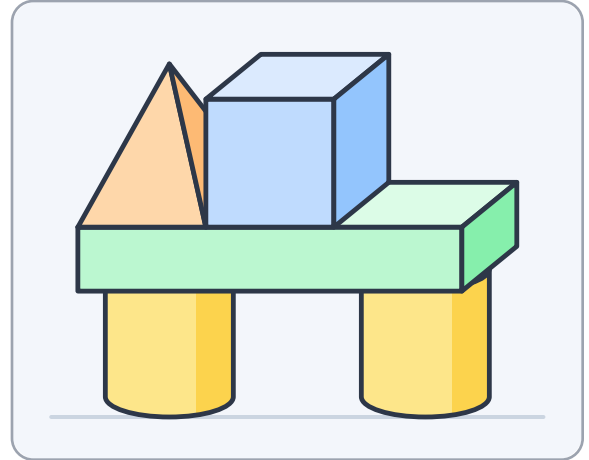

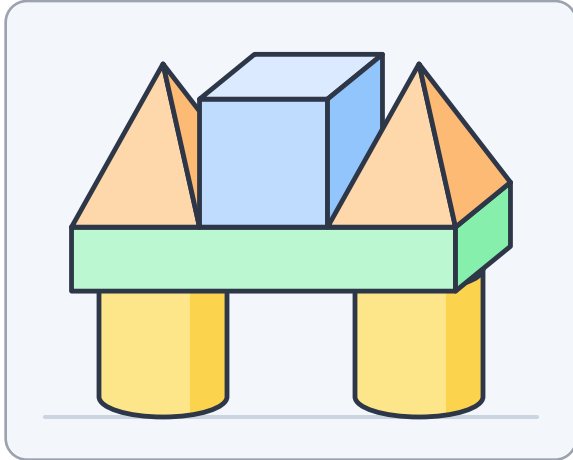

Building with 3D Shapes

One block is gone. Circle the block that is missing.

1.

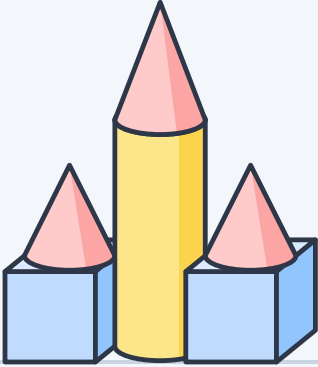

2.

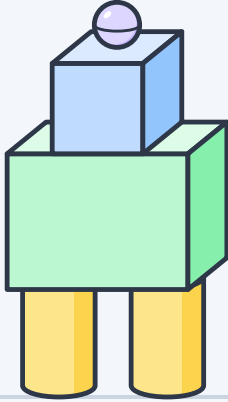

Building with 3D Shapes

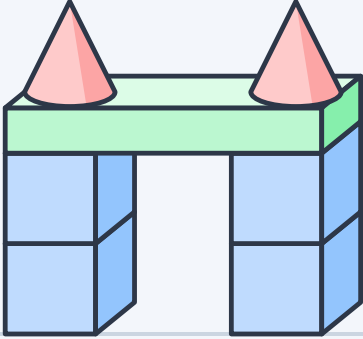

Count the blocks in each build. Then answer the questions.

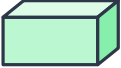

rocket

robot

bridge

	rocket	robot	bridge
 cube	_____	_____	_____
 rectangular prism	_____	_____	_____
 cylinder	_____	_____	_____
 cone	_____	_____	_____
 sphere	_____	_____	_____

1. Which build has the most cubes?

rocket robot bridge
2. Which build has the most cones?

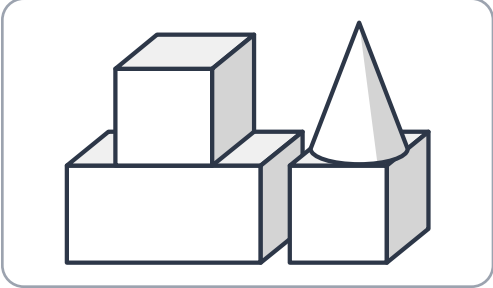

rocket robot bridge
3. Which build has the fewest blocks?

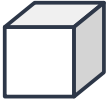

rocket robot bridge

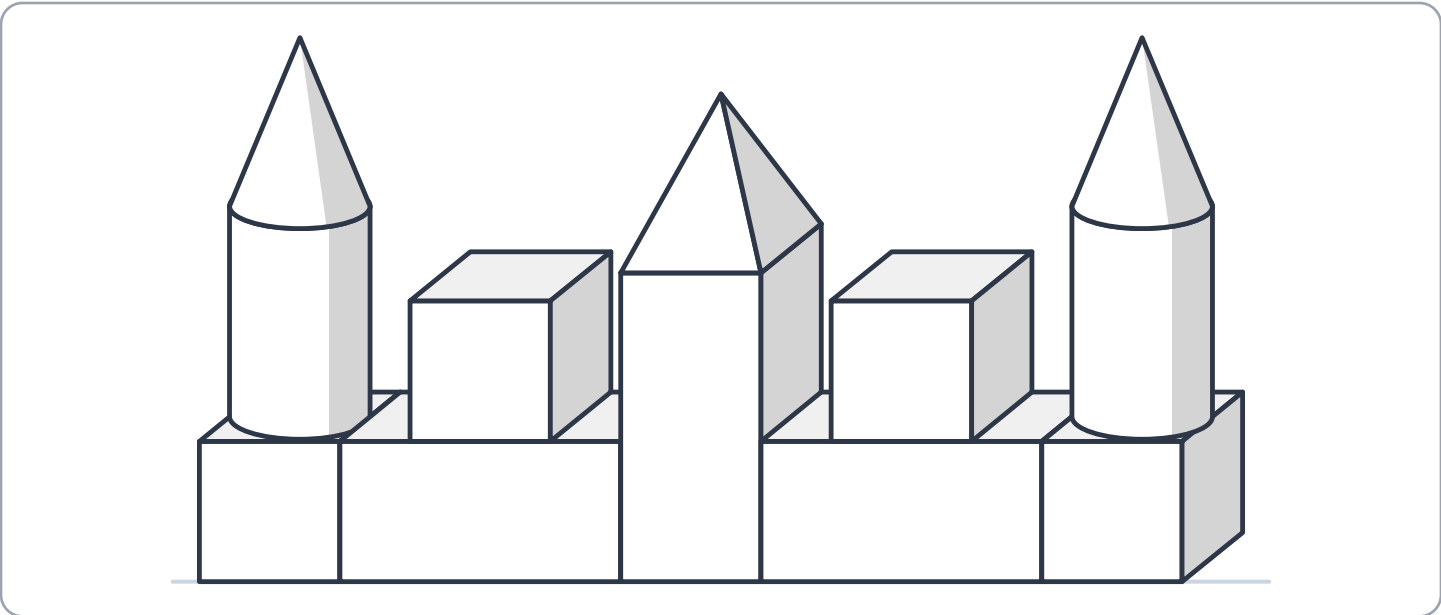

Building with 3D Shapes

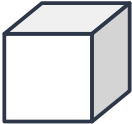

Count each shape in the castle. Write how many.

Example

 cube	 rectangular prism	 cone
<u>2</u>	<u>1</u>	<u>1</u>

 cube	 rectangular prism (box shape)	 cylinder	 cone	 pyramid
_____	_____	_____	_____	_____

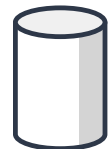

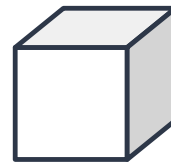

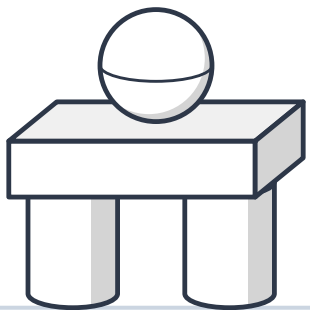

Building with 3D Shapes

Circle the set of blocks that made the build.

1.

2.

Building with 3D Shapes

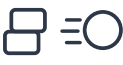

Can it stack or roll? Then find the block that fits.

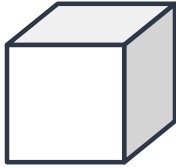

Circle stack, roll, or both.

 stack

 roll

 both

 stack

Which block fits in the middle? Circle it.

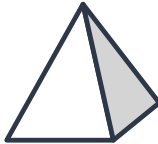

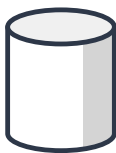

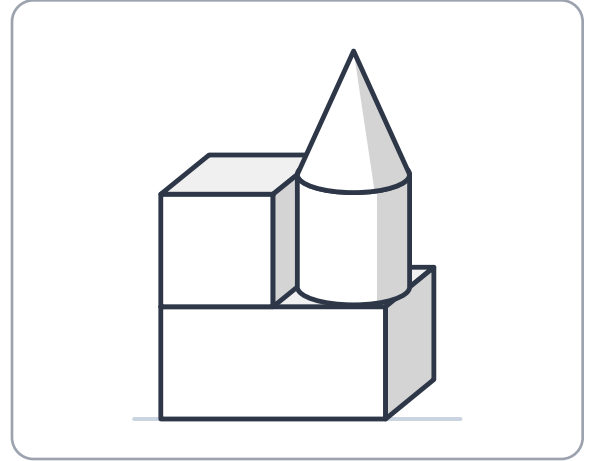

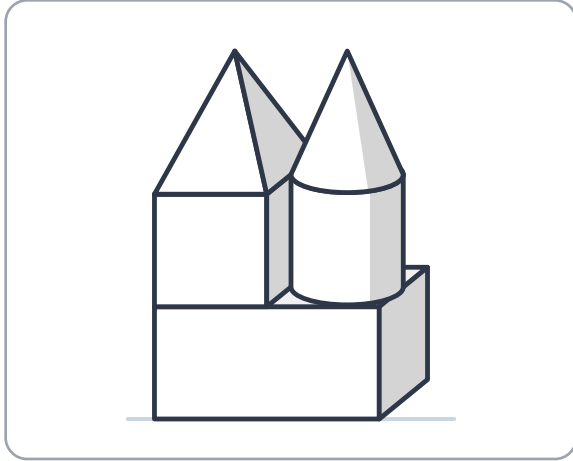

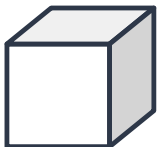

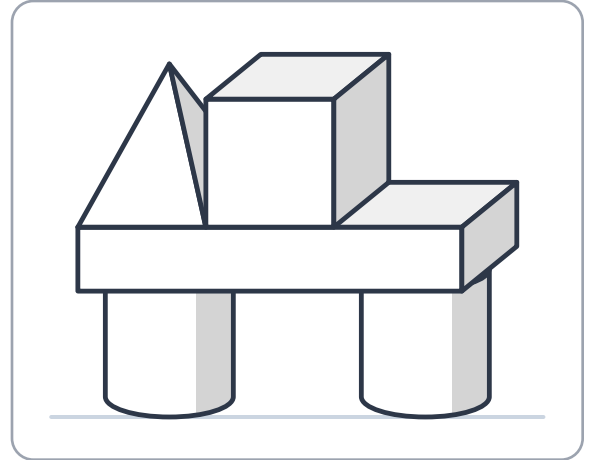

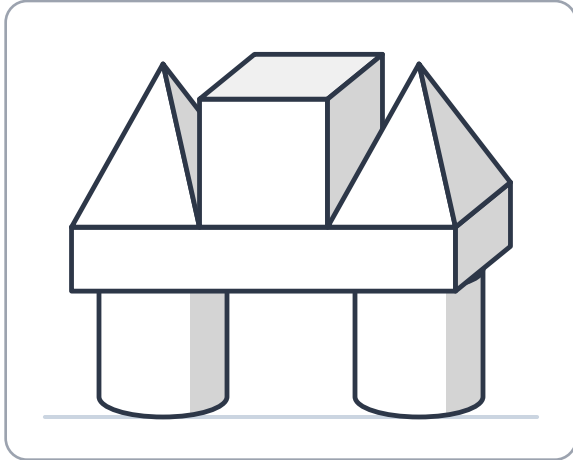

Building with 3D Shapes

One block is gone. Circle the block that is missing.

1.

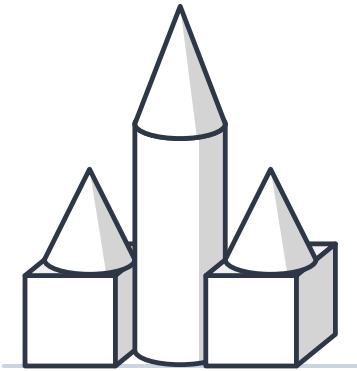

2.

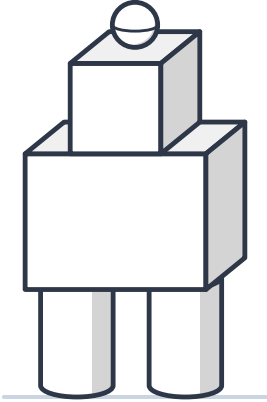

Building with 3D Shapes

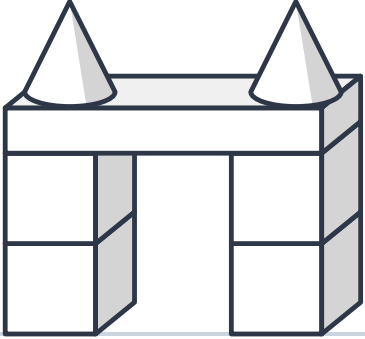

Count the blocks in each build. Then answer the questions.

rocket

robot

bridge

	rocket	robot	bridge
 cube	_____	_____	_____
 rectangular prism	_____	_____	_____
 cylinder	_____	_____	_____
 cone	_____	_____	_____
 sphere	_____	_____	_____

1. Which build has the most cubes?

rocket robot bridge
2. Which build has the most cones?

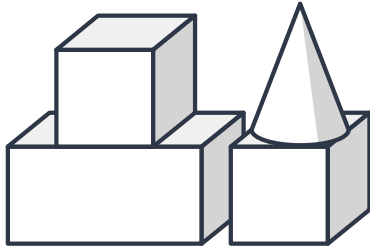

rocket robot bridge
3. Which build has the fewest blocks?

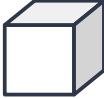

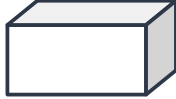

rocket robot bridge

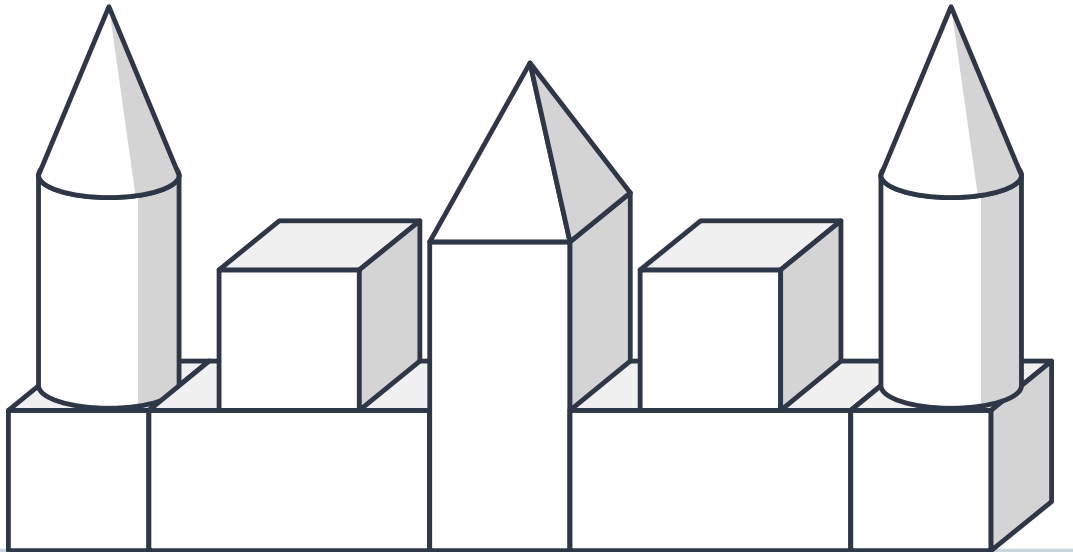

Building with 3D Shapes

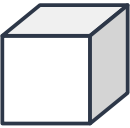

Count each shape in the castle. Write how many.

Example

		
cube	rectangular prism	cone
<u>2</u>	<u>1</u>	<u>1</u>

				
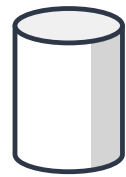

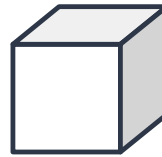

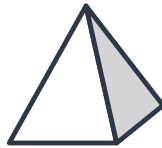

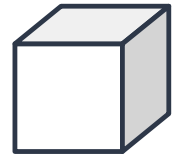

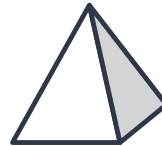

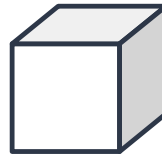

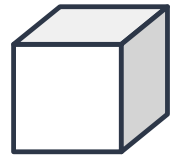

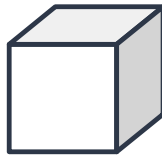

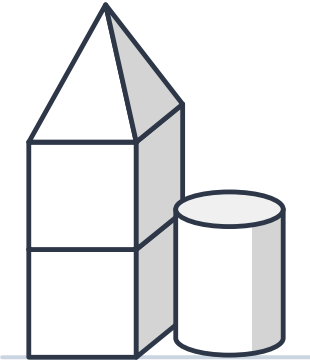

cube	rectangular prism (box shape)	cylinder	cone	pyramid
<u>4</u>	<u>3</u>	<u>2</u>	<u>2</u>	<u>1</u>

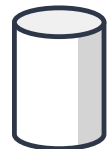

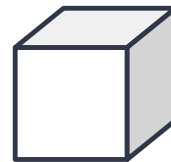

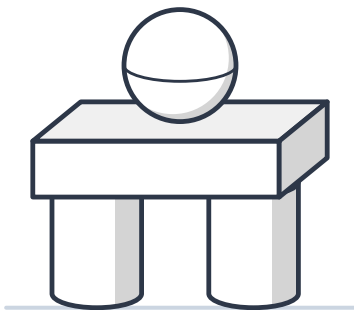

Building with 3D Shapes

Circle the set of blocks that made the build.

1.

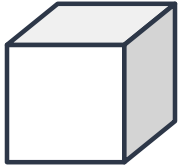

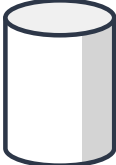

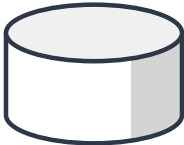

2.

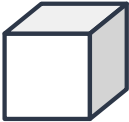

Building with 3D Shapes

Can it stack or roll? Then find the block that fits.

Circle stack, roll, or both.

  stack  roll  both	  stack  roll  both	  stack  roll  both
  stack  roll  both	  stack  roll  both	  stack  roll  both

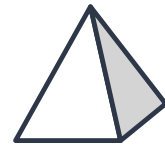

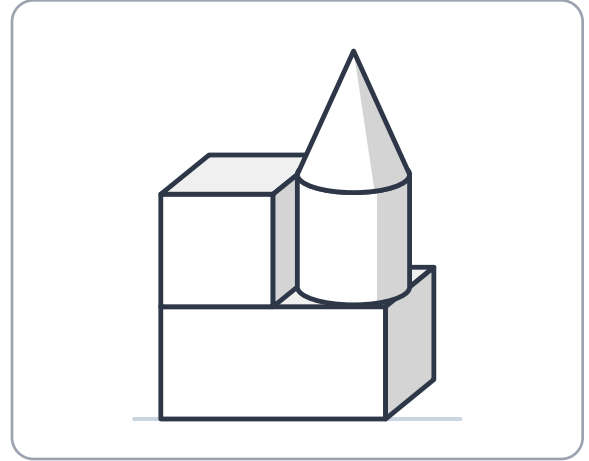

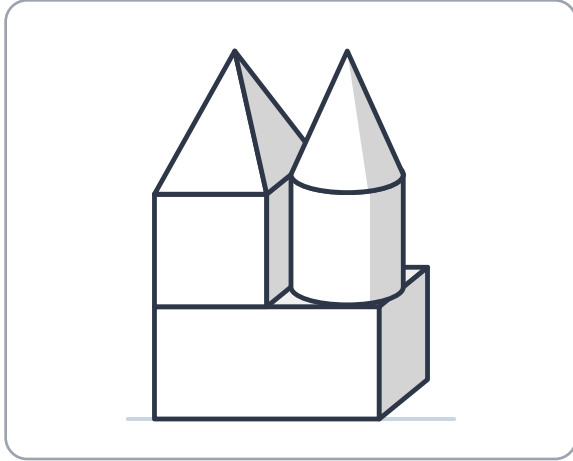

Which block fits in the middle? Circle it.

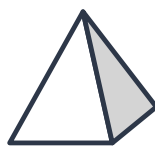

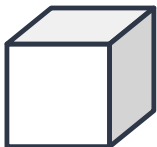

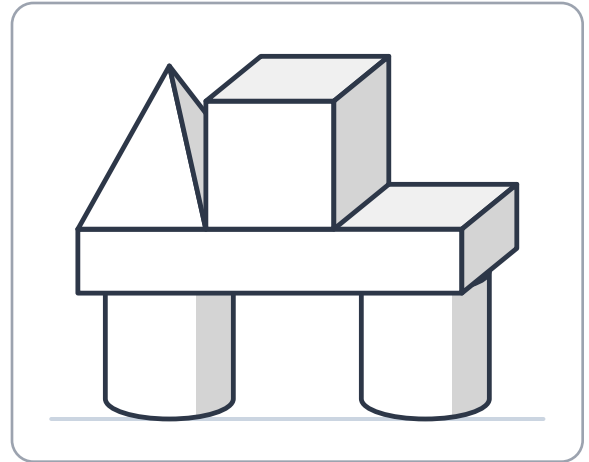

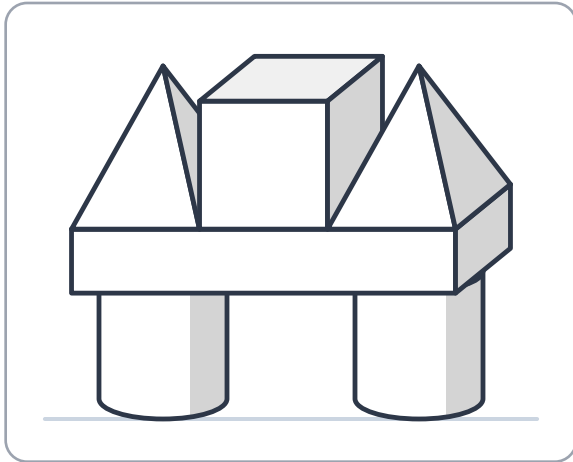

Building with 3D Shapes

One block is gone. Circle the block that is missing.

1.

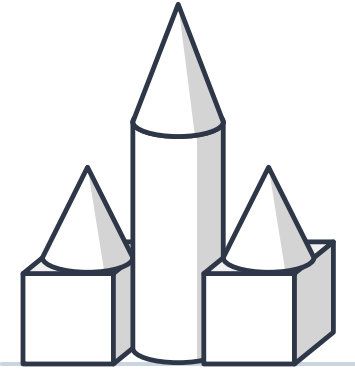

2.

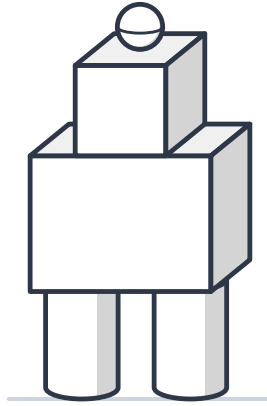

Building with 3D Shapes

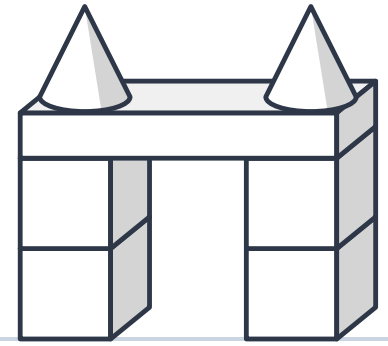

Count the blocks in each build. Then answer the questions.

rocket

robot

bridge

	rocket	robot	bridge
 cube	<u>2</u>	<u>1</u>	<u>4</u>
 rectangular prism	<u>0</u>	<u>1</u>	<u>1</u>
 cylinder	<u>1</u>	<u>2</u>	<u>0</u>
 cone	<u>3</u>	<u>0</u>	<u>2</u>
 sphere	<u>0</u>	<u>1</u>	<u>0</u>

1. Which build has the most cubes?

rocket

robot

bridge

2. Which build has the most cones?

rocket

robot

bridge

3. Which build has the fewest blocks?

rocket

robot

bridge
